Verificare Overview

Verificare is an Indian product developed by the team of OMR home. With the help of Verificare, you can read scanned OMR Sheet within three clicks, for the scanning of OMR sheets you can use any normal ADF scanner. Verificare gives you 100% accurate result and export data into Text and Excel formats. Verificare is used and trusted by more than 200 costumers in India.

Template Creation (Use any OMR sheet or Form)

You have to create a template before checking of the OMR sheets. Once, you have created the template, you can check any number of copies; similar to the template. You can create any number of templates in the software.

Data Capture

With powerful template creation tool you can capture any type of data, you require like; Enrollment Number, Name, Address, City, Email, Sex, Date of Birth, Photograph, Signature etc.

Verificare Overview

Checking Sheets

First, you have to scan the sheets, save the sheets in the folder as required by you. After creating the template you can check the sheets into batch. You can give command for checking multiple folders.

Examination Questions Patterns

Verificare support, the entire examination questions pattern, used in IIT JEE, AIEEE, CBSE, CPMT etc; entrance examinations.

You can define different scores to different questions and get scores section wise. Following are the patterns supported:

- Single Choice Question
- Multiple Choice Questions (MCQs)
- Match Matrix (Match the following questions)
- Numerical Questions

Scanner Requirement

You can use any kind of scanner, all scanners are compatible with the software. ADF (Automatic Document Feeder) Scanners are preferable.

Data Export

The data can be exported to MS-Excel or Text files

Sheet Specifications

Thickness of paper:

The sheet must be thick enough to hold paper straight and the mark of one side should not affect the other side.

Dimension of sheet:

The dimension of the sheet depends upon the scanner; the capacity of the scanner is the ultimate limit of the dimension of sheet.

Designing:

- a. The sheet must contain the rectangular mark on any side of the sheet i.e. either on right or left side of the sheet.
- b. The circles in the sheet must aligned top with the rectangles printed on the sheet.
- c. The sheet must use one color (red, green, blue) for designing. Black can also be used with the selected color of your choice.

Printing:

Any type of printing can work, but the printing must be clear and symmetrical.

Verificare Feature

Read All Types of OMR Sheet

You can create your own templates according to the OMR form design.
